The South Bay Cities Goods Movement Study is being conducted by Iteris, Inc./Meyer, Mohaddes Associates on behalf of SBCCOG with funds from SCAG OWP. This six-month study will collect baseline data about goods movement and its impacts and beneficial effects on the communities of the South Bay. The study will include a technical analysis, surveys of city officials, and focus groups of residents and freight operators. In addition, future projections of truck traffic using the SCAG heavy-duty truck model will be analyzed to show projected changes in goods movement conditions. The information collected will be used to evaluate and prioritize proposed goods movement improvements affecting the South Bay.

The Infrastructure Working Group is being asked to assist with this study by reviewing materials, maps, and reports as needed. Today the consultant team will present:
