

South Bay Sustainable Green Business Program (GBP)

A program of the South Bay Cities Council of Governments (SBCCOG) to help businesses reduce energy, water, waste, and support green mobility – while improving quality of life and making our community more attractive to work, live, and play.

What is the GBP?

A FREE program for South Bay businesses designed to encourage sustainable actions and provide:

- Information, education, and resources from utilities on incentive programs that can save your business money
- Monthly information on utility programs and other valuable tips to reduce energy, water, and waste through e-newsletter
- Resources on green mobility, such as EV and vanpool
- Information to encourage your employees to take action at work and at home
- SBCCOG assistance with getting your questions answered by utility technical support
- Social media visibility through Facebook, twitter, e-newsletter

How do you participate in the GBP?

It is easy to participate in the GBP, just:

- Go to our website and signup for the e-newsletter which will provide you monthly tips and notifications of special programs that could help your business: www.southbaycities.org.
- Also, on the website, you can complete a simple online interest/information form so that we can provide you with more tailored assistance.
- If you have any questions, contact our offices at 310-371-7222.
- The SBCCOG assistance is one phone call away!

It's that easy!

Testimonials

Join the already 181 South Bay Business participants...

Bagels Galore, *"There were many benefits from participating - we connected with SCE's Direct Install program and the lighting in our shop was upgraded."*

Watson Land Company, *"We are honored to work side-by-side with other companies that exhibit such a dedication to sustainability. We participate in energy/water stewardship, waste reduction, transportation, education/outreach, and property management engagement."*

Baskin Robbins, *"I have learned that by making small changes it adds up to big savings. Switching to LED lights at all 3 of my shops has made them brighter and more inviting as well as helped me bring down my energy costs significantly."*

El Segundo Auto Museum, *"We wanted to change the green spaces in front of the museum to be more sustainable by bringing in drought tolerant plants. We added a drinking fountain and gave our staff and docents reusable water bottles which tremendously cut down on the half-empty plastic water bottles."*
