The Evolution of Retail and Its Challenges for Cities

(Separate article for more details)

Jocelyn Milnow andmore erosion, so these two innocuous particles joined.

A truly connected experience, Gamiño added, “would data feeds from the city would help you avoid a ticket by directing you to the side of the street that typically optimize driving times using a relatively small amount of traffic data they collect, plus what it might look like:

City residents. He gave me an example of what one person’s experience in a truly smart city needs with his long-term vision for how a robust digital infrastructure can materially improve the lives of residents.

Gamiño, however, has been steadily improving on the status quo, balancing immediate service and smart pieces of infrastructure link to the Internet but often not to each other. Connectivity seems far

What’s your vision for a truly smart city? What will our lives look like when we’re there?” I asked.

February 23, 2018 General Assembly

All meetings are open to the public.

19th annual South BCCOG General Assembly

February 13, 2018, the South Bay Cities Council of Governments (SBCCOG) 19th Annual General Assembly will be held at the J. E. McDonald Conference Center, 501 South Grand Avenue, in downtown Los Angeles. The SBCCOG has partnered with the Kosmont Companies to create a dynamic program of speakers on a topic that has the potential to change how you consume, commute, and communicate. The program of speakers will cover concepts and development, and how they will change the face of the city.

Food for Thought

The day is extremely busy and there are plenty of subregional progress to inform local leaders and alert them to emerging issues.

South Bay City Councils of Governments

This year’s topic is “The Evolution of Retail and Its Challenges for Cities”.

The annual South BCCOG General Assembly was held in Hawthorne at the J. E. McDonald Conference Center, 501 South Grand Avenue, in downtown Los Angeles. The event was attended by elected officials from the South Bay Cities Council of Governments and their residents. The event was sponsored by Chevron Products Company, a subsidiary of Chevron Corporation.

FACES OF THE SBCCOG – AARON BAUM

Environmental Analyst Aaron Baum provides technical assistance to Transportation and Mobility issues for the SBCCOG. His responsibilities have included management of the Neighborhood Electric Vehicle and Advanced Battery Electric Vehicle studies, the California Energy Commission Grant to study electric vehicle charging in Multi Unit Dwellings, and management of the Metro powered marketing efforts in the South Bay. Aaron has been an integral member of the SBCCOG Climate Action Planning Team in its ongoing mission to develop strategic action plans for all South Bay regions and the regional Local Land and Transportation-climate action plans. He has also been responsible for the transportation technology studies at the Annual General Assembly.

We acknowledge the contributions of the following individuals and organizations:

- **Maelyn Evans**: Accumulated 262 hours since 2016. Received the Annual Bronze Sustainability Award.
- **Miguel Vasquez**: Accumulated 250 hours since 2010. Received the Annual Bronze Sustainability Award.

In 2017, the SBCCOG recognized both annual and cumulative contributions of our volunteers. Annual recognition is based on an individual’s work in the current year, while cumulative recognition includes all prior years. To date, there are over 1,100 volunteers who have given over 725,000 hours of service.

The SBCCOG volunteers have contributed to various projects, including research on land use and energy efficiency, and have been instrumental in advancing wellness initiatives for both students and staff at the South Bay Environmental Services Center (SBESC). The SBCCOG’s volunteers have helped with research on land use and energy generation and storage for SBESC. In addition, the SBCCOG’s volunteers have been engaged in various research projects, including work on recycling and composting, as well as in modeling and leading the way on the importance of specific programs.
We are proud to announce the 2017 Redondo Beach Unified School District Wins National Award for the 2017-2018 school year! The award recognizes the District's commitment to environmental sustainability and its success in reducing energy and water consumption, and increasing recycling and composting.

The award is presented annually by the South Bay Clean Cities Organization (SBCCOG) to recognize the District's efforts in promoting sustainable practices and reducing its environmental impact. This year, the SBCCOG Awards Committee selected RBUSD for its outstanding achievement in sustainability, including its work on energy conservation, water efficiency, and waste reduction.

SPECIAL THANKS TO SBCCOG VOLUNTEERS

FACES OF THE SBCCOG – AARON BAUM

Aaron joined the SBCCOG staff in 2012 as a full-time employee. Prior to joining the SBCCOG, he worked as a Research Associate at the Rand Corporation in Los Angeles, where he conducted research on issues related to transportation and land use planning.

Aaron’s responsibilities have included management of the Neighborhood Electric Vehicle and full-sized Electric Vehicle studies, creating and delivering presentations to audiences at conferences and training sessions, and coordinating with various stakeholders, including local governments, transportation agencies, and community groups.

Aaron is passionate about promoting sustainable transportation solutions and believes that the SBCCOG plays a vital role in helping to achieve this goal. He is committed to working hard to ensure that the SBCCOG continues to play a leadership role in the South Bay region and beyond.

Ingrid honored by LA County

Ingrid passed away on October 25th, 2017. She was a valuable team player and a great representative of the committed staff of the SBCCOG. She will be missed by all who knew her.

TO PROVIDE

The SBCCOG is pleased to announce a new partnership that it has facilitated with the South Bay Waterfront Investment Board (SBWIB) and local government partners. The partnership aims to bring infrastructure projects to the City of Los Angeles.

The SBCCOG has been working closely with these partners to develop a comprehensive plan for improving the waterfront area. This includes developing a Master Plan for the area, creating a Master Plan for transportation, and identifying potential sites for infrastructure projects.

We are excited to be working with the SBWIB and local government partners on this important initiative and look forward to seeing the results of our efforts.
